For every \$10 in visitor spending, an average of \$1.20 in direct, indirect, and induced state and local tax revenues are generated. These increased state and local tax revenues reduce the tax burden on NYS residents.
- Spur job/payroll growth for NYS residents and support local businesses and communities.
- Visitor spending growth enhances local amenities and improve quality of life and pride of place.

### Tourism is Not the Goal... It is the Means to an End

**Tourism growth drives economic growth!** The visitor economy drives job creation, small business success, community revitalization, increased local and state tax revenues, all resulting in improved standard of living, quality of life and pride of place for New York State communities and residents. The multitude of ways tourism growth benefits our state, our local communities, businesses, and residents is a great and largely untold story.
